

Mesabi Pioneers

Here is the highly readable account of one of the remarkable achievements of the 19th century: how a remote tree-covered area of northern Minnesota became America's greatest source of iron ore. It is 1891. An improbable team of American businessmen and European immigrants hunt for iron ore in a formidable expanse of dense pine forest. Fighting isolation, harsh winters, and mosquito-infested summers, they find it. What follows is an extraordinary tale of both personal and technological achievement. *Mesabi Pioneers* brings the pursuit of iron ore to vivid life, illuminating the men and women mostly forgotten by history, who built an industry, carved towns from trees, and created a rich culture that lasts to this day.
